May 14, 2007

We are pleased to announce the general availability of Computron Enterprise - Release 10.0.1.

This release, the latest of our 10.0.x incremental releases, includes support for the following platforms:

- ◆ Sun Solaris v.9 and v.10 with Oracle 10g and Oracle 9i (carried forward from the initial 10.0 release).
- ◆ Windows 2003 and 2003R2 with SQL 2005, SQL 2000, Oracle 10g, and Oracle 9i.
- ◆ AIX 5.2 and 5.3 with Oracle 10g and Oracle 9i.
- ◆ HP-UX 11i (and 11i v2) with Oracle 10g and Oracle 9i.

Computron Enterprise includes full cradle-to-grave auditing capabilities for our General Ledger (JCM). In addition, the JCM module includes a new e-cellerator which allows for the inspection and approval of transactions via the Internet. These and other enhancements to our systems will enable users to navigate through the increasing complexities associated with compliance regulations.

Please take a moment to read the **Management Overview**

([http://www.computronsoftware.com/pdf/management\\_overview\\_10.0.1.pdf](http://www.computronsoftware.com/pdf/management_overview_10.0.1.pdf)), which details the additional functionality in this release.

If you have not already done so, please contact your Engagement Manager or Computron Software Professional Services to schedule your upgrade and conversion to Computron Enterprise release 10.

Thank you for your continuing use of and interest in Computron Software's Enterprise solutions.

Best Regards,  
The Computron Software Team
